RDT
rotary drilling tools

Hello – as Managing Director for Rotary Drilling Tools-USA (RDT) it is my pleasure to present to you our product brochure highlighting on the products and services that we have available and showing the growth that our company has achieved in just a few short years.

At RDT we pride our self on high standards of operation and service excellence. Through technical innovations and improved processes we continue to follow our number one objective of providing excellent customer service along with the highest quality products in a timely manner. At RDT our first priority is always continuous customer satisfaction. Thank you for taking the time to look at our capabilities and we look forward to working with you in the future.

A handwritten signature in black ink that reads "Sealy Morris". The signature is written in a cursive, flowing style.

WHO WE ARE

Back in 2006, Rotary Drilling Tools (RDT) began supplying high quality and API certified drilling tubular tools to operators and drilling contractors. Superior standards along with in-house testing and inspection attained through years of experience and the very latest equipment has resulted in RDT attaining its position in the downhole tool business in a very short time span. Our roots are well known in the industry as pioneers in the formation of two existing major drilling tubular suppliers. With over 150 collective years in the manufacturing of oilfield tubular products within our management team, we offer a vast array of experienced "know how" when it comes to providing the best tubular drilling products in the market place.

Our primary objective was to provide our customers with the best tubular drilling tools in the market place and having an extremely responsive sales force with a focus on complete customer satisfaction. This philosophy is STILL the corner stone for our company.

Beasley, Texas

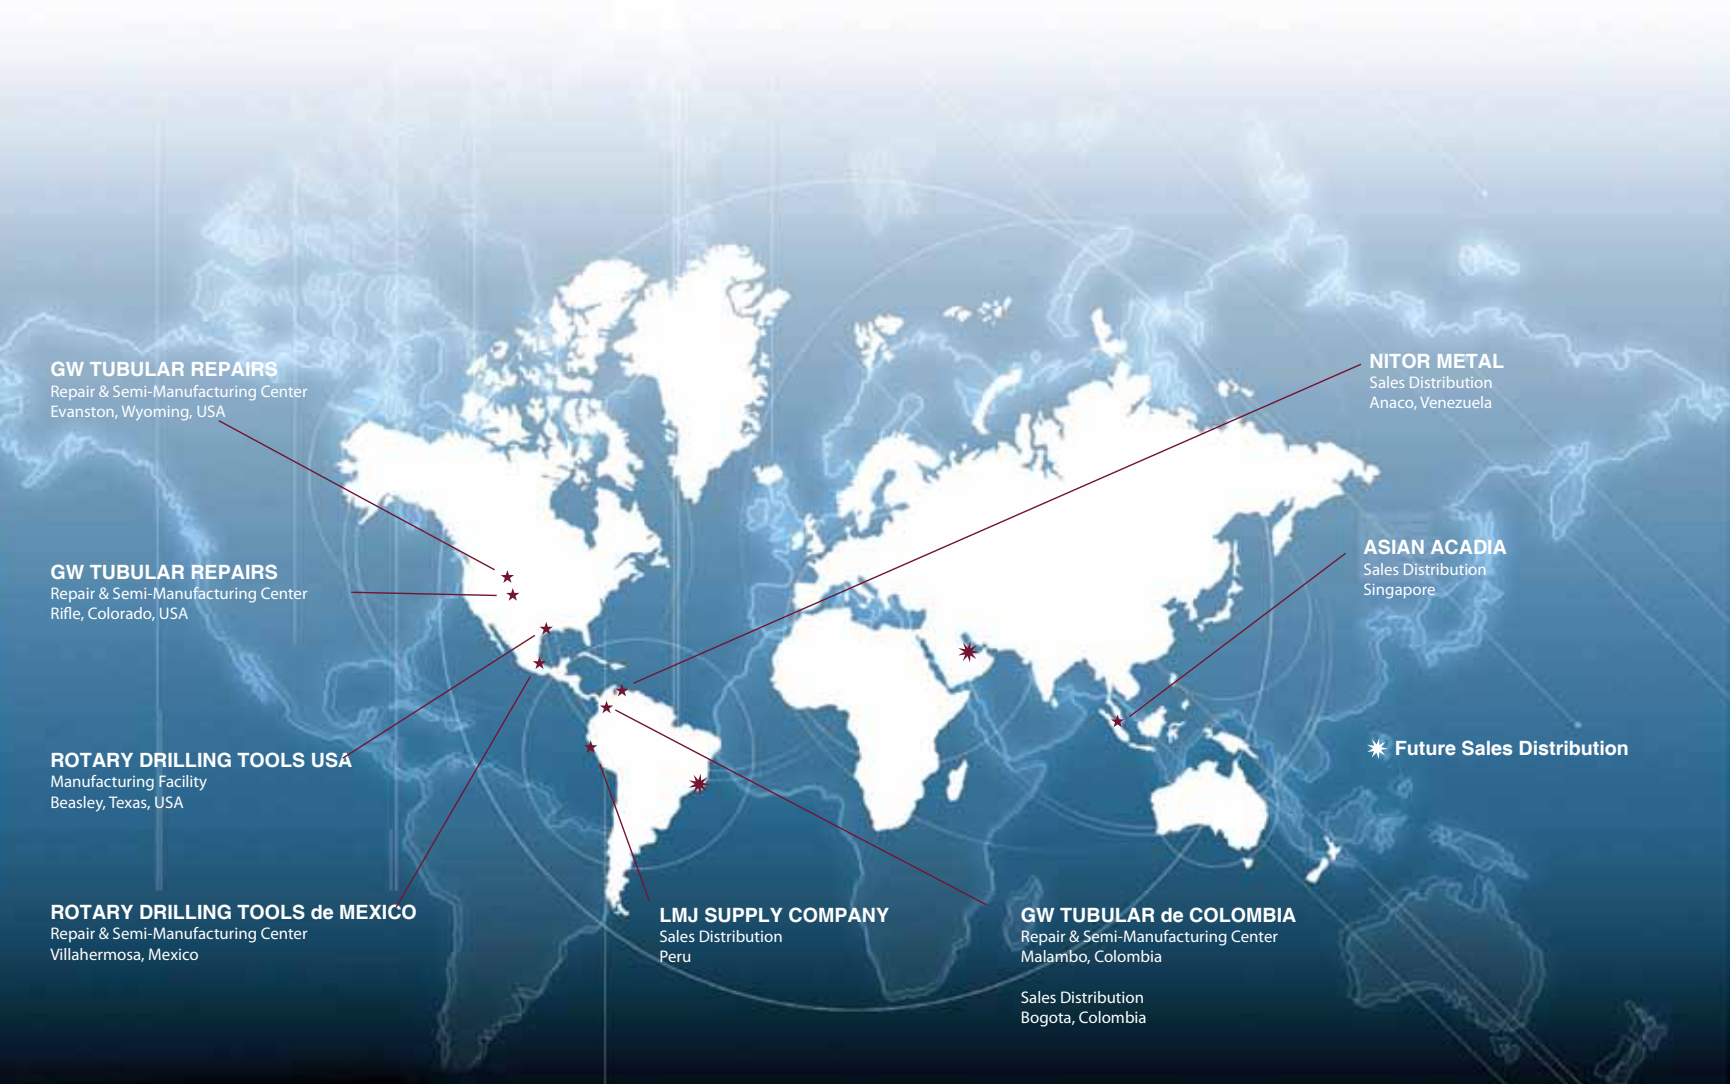

OUR CAPABILITIES

With our state-of-the-art manufacturing facility in Beasley, Texas, we offer a vast array of tubular products and services. Our plant is APE certified with: API SPEC 7, API SPEC 7-1, API Q1 SPEC and soon to be API 5D. We have now expanded our domestic footprint and have domestic repair facilities that also have semi-manufacturing capabilities in Wyoming and Colorado.

In keeping with the growing trend for international drilling we have opened three sales/distribution centers in Singapore, Venezuela and Peru. We also have an additional quality repair facility which also has semi-manufacturing capabilities in Colombia.

In 2010, to service an expanding Mexican market, we opened a new sales/distribution office in Villahermosa, Mexico. This year we will be expanding our presence in Mexico with the opening of our new repair facility with semi-manufacturing capabilities. We are excited to add this new facility in Villahermosa to our growing global footprint.

As we move forward, we will continue to evaluate where/how we can best service our customers with future worldwide sales/distribution and repair centers.

PRODUCT OFFERINGS

Within the walls of our state-of-the-art manufacturing facility, we have the equipment and trained personnel to produce a superior tubular product with consistent quality. Our manufacturing goal is not only to meet our customer's demands, but to focus on exceeding them. Our manufacturing capabilities include:

DRILL PIPE
HEAVY WEIGHT DRILL PIPE
TUFF-TUBE HEAVY WEIGHT
DRILL COLLARS
DRILLING ACCESSORIES

MACHINE SHOP SERVICES

Focusing on saving our customers time and money is one of RDT's main criteria. By utilizing innovative ideas and concepts, we can take your used drilling product and make it serviceable once again. By re-working your existing products the general savings would be 50% compared to the cost of new pipe and the turn-around time is much quicker than building from scratch. Our machine shop capabilities include:

RE-TOOL JOINTING
RE-CERTIFIED HWDP
TUBULAR SERVICES

Within this brochure you will find individual Product Data Sheets for each of the items listed.

Technological innovations and improved processes are a way of life at RDT and we pride our self on high standards of operation and service excellence. At RDT we will always make our customer's needs our first priority. We constantly search for ways to better service our customers and most importantly to improve our customer's bottom line. Please contact our sales force and let us show you how we can improve your returns.
